

COMPUTER RECCOMENDATIONS FOR GPUNCHER.

1. A minimum **dual core** CPU with a minimum of 3,0 Ghz
2. 64 bit architecture with any windows, 7, 8 or 10, 32 bit is OK too.
3. 16 Gb of Ram memory
4. A at least 1 Gb real graphics card with a fast speed clock of 1000Ghz or more, our prefered is 2Ghz- DO NOT CONFUSE WITH AN INTEGRATED GRAPHICS CARD, INTEGRATED IS NOT A REAL GARPHICS CARD, we recommend a real graphics card
5. You hard drive capacity depend of how much programming and storage you would do, now days 1 Tb is normal. The fastest the better, 7200 RPM reccommended.
6. 24" screen monitor, 27" is our prefered with aminimum resolution of 1920x1080

This is what we recommend but all depends on how heavily you would use your computer with how many applications open at the same time.
